

# Shipping and Logistics

Minerra Tech coordinates the sourcing and delivery of ASIC miner batches across North America. Every batch listed on the platform is verified with its supplier or broker before being offered for sale.

## Fulfillment

- Orders are shipped directly from the supplier or broker's facility to the buyer's destination.
- Minerra Tech manages communication between both parties to ensure smooth packaging, pickup, and dispatch.
- Average handling time is three to five business days after full payment confirmation.

## Carriers and Methods

- Freight and air express options available depending on batch size and delivery location.
- Palletized freight is standard for bulk orders while smaller shipments may use FedEx, UPS, or DHL.
- Buyers may also arrange their own transportation if preferred.

## Customs and Duties

- Import duties, taxes, and customs clearance can be handled by either Minerra Tech or the client, depending on the order.
- Full commercial invoices and export documentation are always provided when required.
- Domestic US shipments generally require no import declaration.

## Risk and Insurance

- Ownership and risk transfer once the carrier collects the shipment.
- Insurance coverage can be added upon request prior to shipping.
- Tracking details are provided immediately after dispatch confirmation.
